Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

THE JOURNAL OF PHILOSOPHY PSYCHOLOGY AND SCIENTIFIC METHODS

Sub-Station 84, New York City

$3.00 per annum (26 numbers) **15 cents per copy**

TWO BOOKS BY

LESTER F. WARD

Applied Sociology

There is no question that Dr. Ward is the greatest authority on fundamental social science in the world today. Applied Sociology is regarded as his crowning achievement. Its purpose is to point out how the obstacles to human progress may be overcome by the application of the principles of human science.

Psychic Factors Of Civilization

This work is an original contribution to both psychology and sociology. It endeavors to show in a systematic way the workings of mind in social phenomena.

CARVER'S SOCIOLOGY AND SOCIAL PROGRESS

A compilation of the more significant observations made by the moralist, the metaphysician, the philosophic historian, and the man of science, upon the phenomena of society in general, upon the laws of social growth and decay, and upon the problems of social improvement.

GINN & COMPANY, 29 Beacon Street, Boston

PLANT BREEDING

Comments on the Experiments of

NILSSON AND BURBANK

BY

HUGO DE VRIES

Professor of Botany in the University of Amsterdam.

A scientific book in simple language. Intensely interesting as well as instructive. Of special value to every botanist, horticulturist and farmer.

Pp. xv + 360. Illustrated with 114 beautiful half tone plates from nature. Printed on fine paper, in large type. Cloth, gilt top. Price, $1.50 net. Mailed, $1.70.

Supplied by your dealer; or direct, on receipt of your order with the mailing price.

"Naturally I have perused the contents of your book, PLANT BREEDING, with intense interest. Therefore I first of all beg you to accept my heartfelt thanks for the exceedingly appreciative and sympathetic representation of the work of our institution here, and indeed of my own part therein. Next I must congratulate you most cordially upon the excellent service you have performed in this standard work. It is simply marvelous! The clear, concise presentation, the consistent, sustained treatment of the whole history of selection in agricultural plants according to your modern theory, which now at last makes everything clear, the masterful disposition of the rich and manifold material—all unite to make this book decidedly the best which has been accomplished along this line up to now."

Extract from a letter to Professor De Vries by Dr. Hjalmar Nilsson of the Swedish Agricultural Experiment Station at Svalof.
